

Project Manager - Millwork

Established in 1989, Terlin has become a leader and innovator in full-service construction for retail, commercial, and institutional clients. Distinguished by their end-to-end approach and unparalleled reputation for quality and reliability, Terlin's state-of-the-art facility houses their custom Millwork shop which provides an exclusive focus on the specialized needs of their clients. From design through construction and service, Terlin handles every aspect of interior construction and delivers outstanding and consistent results.

The Terlin Team is a talented and driven group of experts, tradespeople, designers, and project managers. In addition to their skilled partners and sub-trades, Terlin's complete team is made up of close to 200 dedicated individuals – each committed to making customer service and satisfaction their highest priorities. **And they are always looking for great people to join their team!**

The Opportunity

Terlin is currently searching for a fulltime, experienced, and dynamic Project Manager with retail, institutional, commercial, and institutional millwork experience to join our team. The environment is fast-paced and growth-oriented – ideally suited for individuals who like to take charge and are driven to build on current successes.

Responsibilities

As a Project Manager, you will be responsible for building business success by identifying, qualifying, establishing, planning, implementing, maintaining, and coordinating millwork projects within the decided-upon budget, timeline, and scope. The functions include business development, cost estimation, organizing and planning, as well as preparing close out and reporting documents, all while collaborating with sub-contractors and colleagues to ensure the successful delivery of projects.

Specifically, the Project Manager will be responsible for:

- Development of project plans and timelines.
- Contract administration.
- Risk identification and issue resolution.
- Analysis and planning.
- Review all shop drawings and manage changes as required.
- Maintain appropriate inventory level as well as oversee all new material orders.
- Coordinate delivery and installation.

- Resolve issues that arise with high customer service standards.
- Managing project fees, invoicing, schedules, execution, deliverables, and the quality of the projects during design and construction.
- Reviewing project documents (drawings, specifications, RFI's, etc.) and evaluating the completeness for the respective phase of production.
- Evaluating requested changes and managing the change process.
- Project reporting and updating relevant stakeholders / team members on project progress.
- Coordinating sub-trades and suppliers as necessary.
- Identifying business opportunities with current and prospective customers and by researching the industry and market trends.
- Procuring and executing a portfolio of projects ranging from multiple small projects to major projects.
- Collaborating with the Finance department as it relates to budgets, expenses, and profits as well as detecting cost-related issues.
- Providing weekly projections to the executive team.
- Coaching and supporting project team members with assigned tasks.

The successful candidate is a self-starter who possesses excellent communication skills, is extremely organized, detail-oriented, has a positive attitude, knowledge of the architectural woodworking business, and have the ability to multi-task and work well under pressure and deadlines.

Qualifications

- Minimum three (3) years of experience working in a commercial millwork environment or similar project management experience.
- Strong business acumen as it relates to full project management including conceptual/detailed estimating, scheduling, cost controls, reporting, and demonstrated ability to manage budgets and schedules within project expectations.
- Professional and diplomatic.
- Strong business acumen in project planning and management.
- Ability to read, analyze, and interpret construction drawings.
- Proven written / verbal communication and interpersonal skills to lead diverse cross-functional teams.
- Excellent time management and computer skills.
- Ability to motivate, think outside the box when needed, and willingness to adapt to new concepts.
- Ability to recognize issues as challenges and capacity to work well under pressure.
- A valid Secret security clearance (or ability to successfully obtain same) is a requirement of the position.

- Bilingual (English and French) would be considered an asset.
- Experience using the construction software Procore would be considered a significant asset.
- PMP Designation would be an asset.
- Some estimating experience would be an asset.
- A valid driver's license is required.

What Terlin Has to Offer
